-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,16 are rejected under 35 U.S.C. 102(b) as being anticipated by Stom (Acta hydrochim. Hydrobiol. Vol 5, 1977, no. 3, pp.291-298.). Stom teaches a method of treating aquatic plants (Dunaliella salina, Nitella sp., and Elodea Canadensis) with a composition comprising p-benzoquinone. Stom teaches that p-benzoquinone is toxic to the aquatic plants.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5,7,8,18-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stom as applied to claims 1,2,16 above. See 35 USC 102(b) rejection above. Stom teaches all that is recited in claims 5,7,8,18-84 except for the invention comprising algae, the instant amount of benzoquinone, and the exposure time of plants to benzoquinone. However, it would have been obvious to one having ordinary skill in the art to employ algae in the prior art invention.

Art Unit: 1616

One would have been motivated to do this since algae are species in the plant genus. With respect to amount or concentration of benzoquinone and exposure time of plant to benzoquinone, one would have optimized the invention during routine experimentation. One would have been motivated to do this in order to develop an invention that would have effective in controlling aquatic plant growth.

Claim Objection / Allowable Subject Matter

Claims 3,4,6,9-14,17,25,26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art does not teach or suggest killing the target aquatic pests of these claims by applying an instant benzoquinone compound to the water infected with the pests of in these claims. Claims 27-31 are allowable for reasons on record.
